

Gets rid of
Microbes like none other

Zepazon

Zepazon S-1.5gm Cefoperazone (1000mg) + Sulbactam (500mg) **Injection**

Zepazon TZ-1.125 Cefoperazone Sodium (Sterile) I.P. 1000mg + Tazobactam Sodium (Sterile) I.P. 125mg **Injection**

Zepazon S-1gm Cefoperazone I.P. 500mg + Sulbactam I.P. 500mg **Injection**

Cefoperazone:

- Can be recommended for the clinical practice against gram bacteria exhibiting resistance to other antimicrobials & is a cheaper alter-native to meropenem.
- It is one of few cephalosporin antibiotics effective in treating pseudomonas bacterial infections which are otherwise resistant to these antibiotics.

Tazobactam:

- Is a beta lactamase inhibitor and prevents the interaction of the enzyme with the antibiotic molecule.

- In such a way it extends the spectrum of cefoperazone

Sulbactam:

- Enhances the activity of Ceftriaxone against many resistant strains of bacteria

In.

Bacterial septicemia

Peritonitis

Endometritis

Pelvic inflammatory
disease
